

DuROCK Uni-Flash

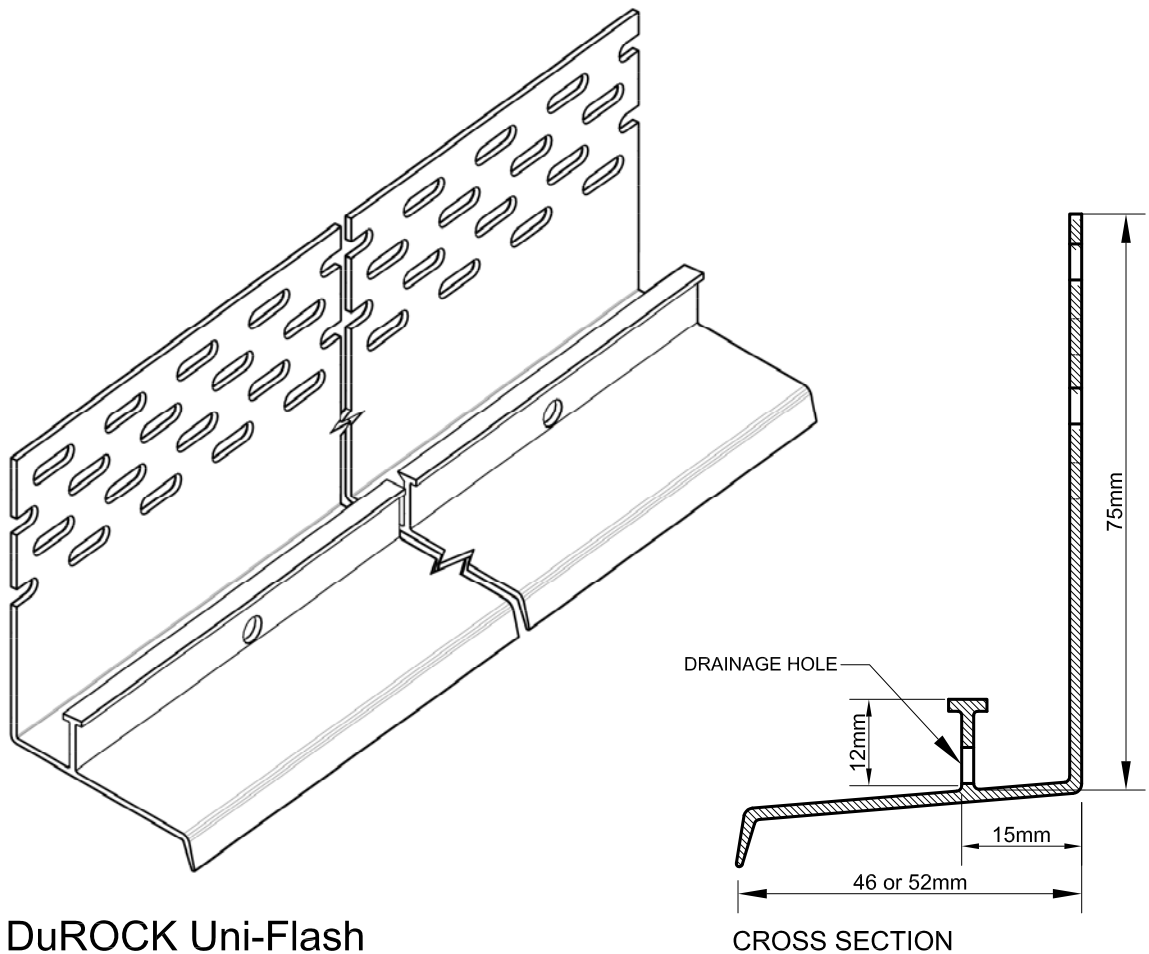

EIFS Self-Flashing Drainage Track

PRODUCT DESCRIPTION

DuROCK's patent pending **Uni-Flash** is a PolyVinyl Chloride (PVC) extrusion designed to be used at window head locations where DuROCK Exterior Insulation Finish Systems are expected to drain. It's one-size-fits-all profile eliminates the need to stock different profiles for every insulation thickness. DuROCK **Uni-Flash** is eight feet (2.44 m) long and is available in 1¾ inch (46 mm) and 2 inch (52 mm) widths. It is white in colour, but can be painted with most exterior latex paints.

INSTALLATION

DuROCK **Uni-Flash** may be either embedded into the wet DuROCK Air/Moisture Barrier appropriate for the substrate or it may be mechanically fastened to the substrate with corrosion-resistant screws. Butt ends tightly together, and seal ends at termination points and at corners. Refer to the applicable EIF System details for more information.
